

A Danish brand since 2015

Collection 2021

Once again, we are ready to present a new collection from Design For The People. Before our novelties see the light of day an extensive process goes into creating each and every design. This year is no exception.

The first step in the process of designing a new collection is inspiration. Finding inspiration for materials, shapes, colors, and direction is key to the process. We have sought inspiration in nature with its imperfect and organic shapes, in earlier style periods like Art Deco and also in the present modern style. We look at forecasts and trends, embrace them and temperate them to fit into our own design universe.

Next step is to brief the designers we work with and inspire them to start their creative process. Through our ongoing collaborations with contemporary Danish designers, we strive to design pieces that maintain a sophisticated and classic look for years to come.

Design For The People has its own DNA – a unique set of characteristics that is defining the essence of the brand and is rooted in the overall concepts, materials we work with, the details, the colors we choose and the finished designs we present to you.

We define our DNA as: **Danish design, Contemporary, Made to last.**

Behind all our designs is one or a team of Danish designers that strive to create aesthetic synergy between materials, shape, and function. The perfect contemporary design is often made by looking into the past and the future and using what is good and lasting. Made to last is how we see our designs – as timeless pieces you will value for many years.

This year – more than ever, we want our designs to enhance our lives and the spaces surrounding us. Creating a comforting feel and ambience in your home, where you want to live and spend time.

We proudly present the 2021 Design For The People Collection

Red Dot Design Award

Glossy Table
Red Dot Award Winner 2021

The Red Dot Award is one of the most recognized international design contests in the world and has been a quality stamp in the design industry since 1955.

Each year, Red Dot receives more than 17,000 entries from close to 60 countries, which will subsequently be reviewed and judged by a jury of 40 independent design experts.

The price is divided into three categories: Product Design, Design Concept and Communication Design. Red Dot is organized by Design Zentrum North Rhine Westphalia in Essen, Germany.

You can turn off the light, but I'm still gonna shine

Glossy Table
Red Dot Award Winner 2021

"Glossy is my favourite lamp. I feel that it successfully balances form and a mix of materials. The entire construction and expression of the lamp is simple and timeless. It makes me proud and incredibly happy that the design has been acknowledged with a Red Dot Award"
designer Maria Berntsen.

Originally Glossy was thought to be a smaller, portable lamp, but since evolved through the creative design process into an exclusive table lamp carried out in a material mix of marble, opal white glass and elegant brass details. The combination of materials is perfectly matched, but at the same time creates interesting contrasts. The almost suspended glass shade is elegantly contrasted by the heavy marble base, both beautifully intertwined by the brushed brass details.

A pleasant, softened light shines through the lightweight shade – and the shiny surface maintains its' special glow, even when the light is turned off.

Maria Berntsen

Holds degrees from both The Royal Danish Academy Art and L'Ecole d'Architecture
Based in Copenhagen, Denmark

With her own design studio in Copenhagen, Maria Berntsen has since 1992 focused on architecture and design. Maria Berntsen is a well-established name in the design industry and has over the years collaborated with a wide range of Danish and international companies, where her extensive experience has resulted in many successful designs.

"At the start of a new project, I look for an idea with nerve, functionality and identity. By modelling and visualizing, I test the idea, how it might be used, and its presence.

Good design communicates and establishes a dialogue with the receiver. Design is not just about functionality – it is as much about the emotional connection and impact. To me, success is when my design brings joy in the everyday lives of people"

Maria Berntsen
Owner and designer

Shapes Table, Brass by Maria Berntsen

Watch video 

Shapes

The Shapes series by Danish designer Maria Berntsen draws inspiration from elegant, organically shaped jewellery. The opal glass shade is carried out in a unique, asymmetrical form that plays beautifully together with the shiny brass base and creates a refined and intriguing expression. The lamp emits a soft and diffused light through the mouth blown glass shade that is perfect for working or relaxing.

Shapes Pendant 22, Brass by Maria Berntsen

Align Table, Black by Maria Berntsen

Watch video 

Align Table, Grey by Maria Berntsen

AlignTM

Align is a series of contemporary and elegant table lamps by Danish designer Maria Berntsen that encourage interaction and curiosity. The inner shade of the lamp is static, while the outer shade can easily be moved for a changeable light that fits any need. The design language is simple, yet playful with a satin soft, matt surface and beautiful brushed brass details.

Align Table, White by Maria Berntsen

Watch video 

Mobile Pendant, White by Maria Berntsen

Mobile

Danish designer Maria Berntsen has created the classic, yet unique Mobile pendant in a slim and elegant design. The two rounded shades and discreet brass detail give the pendant a modern and light look that is perfect above the dining table. Light reflects from the bottom shade onto the opalized top shade releasing a beautiful, diffused and glare-free light. You can easily adjust the shades closer together for a centred, downward light or further apart for a more diffused light spreading out in the room.

Learn more about Mobile on p86

Stay Pendant, Black by Maria Berntsen

StayTM

Stay is designed by Maria Berntsen and is a modern, yet timeless lighting design at the same time. The oblique cut of the shade creates an open and pointing shape that allows for lots of light to shine through. The Stay pendant emits a soft, comfortable light both upwards and downwards – and creates the perfect ambience for cosy moments around the dinner table.

Stay Long Wall, Grey by Maria Berntsen

Watch video 

Stay Long Wall, Grey by Maria Berntsen

Stay wall

"My idea was to create a timeless lamp series that could be included in the modern home.

I wanted to use the LED technology we know with the option to dim the light, thus providing the perfect lighting for working/reading or a cosy coffee on the sofa."

– Maria Berntsen

Stay Long Table, Grey by Maria Berntsen

Angle Wall, Black by Maria Berntsen

Angle™

Angle wall light by Danish designer Maria Berntsen is a modern and timeless design that fits perfectly as a bedside light or above the bathroom mirror. The lamp is carried out in a playful and interactive design with a magnetically attached shade that can easily be adjusted to fit your needs. Turn, tilt or move the shade for a directional or indirect light. A USB charging port on the side conveniently lets you charge your phone or other device.

Glossy Table, Opal white & marble by Maria Berntsen

Watch video 

GlossyTM

Glossy is the epitome of tasteful and sophisticated design. The Danish designer, Maria Berntsen, has created a table lamp that oozes of Nordic minimalism, and where the combination of the exclusive materials, marble, brass and opal white glass contribute to an incredibly elegant design. Glossy is named after the shiny surface of the opal white glass, which lets a soft and comfortable light shine through.

Bjørn + Balle

Design is a part of our identity
Based in Copenhagen, Denmark

The designers combine minimalistic Scandinavian design with international trends. It's about image creation and recognizability. The overall identity of the product is its form, function, details, structure and materials, which all comes together. A product never stands alone but is part of an environment where the story being told supports the design.

BJØRN + BALLE have both carried out a large number of design tasks for both national and international clients at many different areas, such as product design, furniture design, interior design, identity programs and exhibitions, and together they have great success with lighting design.

BJØRN + BALLE has delivered a wide range of innovative technical solutions for the industry, as well as beautifully designed products for the consumer market.

Blanche

The Blanche series by Bjørn + Balle is carried out in a classic design with elegant art deco references. Brushed brass details encircle the opalized diffuser that emits a soft light both upwards and downwards. The slim design makes the pendant perfect above a dining table. Dimmable for obtaining the perfect light for every situation.

Blanche 42, Opal white & brass by Bjørn + Balle

Nori 27 Pendant, Smoke by Bjørn + Balle

Nori 39 Pendant, Black by Bjørn + Balle

Nori

Nordic minimalism and suspended lightness are the keywords for the Nori pendant series by Danish designers Bjørn + Balle. Organic, rounded shapes furnish the design with an unmistakable ease that is complemented by the warmth of oiled, walnut wood on top.

It fits easily into a wide range of interior design contexts – creating various looks depending on size and colour.

Learn more about Nori on p90

Nori 27 Pendant, Black by Bjørn + Balle

Darci Table, Black by Bjørn + Balle

Darci™

With a cool and industrial design, the Darci series by Bjørn + Balle is both a highly functional and aesthetic addition to your home. Perfect next to your sofa, armchair or any other place in your home that needs a stylish and functional light. The beautifully curved lamp head is easily adjusted whether you need it for reading, working or just adding the right ambience to the room. High quality materials with a satin soft, matt surface radiate a modern and streamlined look.

Learn more about Darci on p88

Strap Floor, Black by Bjørn + Balle

*Strap*TM

Metal and leather goes well with the light Nordic style. The combination of these materials allows the light to visually interact with a modern interior, where combining materials is one of the biggest trends. With Strap it seems obvious – just as obvious as how a Nordic light design is named after a leather strap.

Learn more about Strap on p96

Strap Table, White by Bjørn + Balle

Strap Pendant 36, Black by Bjørn + Balle

Strap Table 16, Opal by Bjørn + Balle

The narrow and elegant leather gives Strap a warm and raw look, balancing a classic and the industrial expression. It comes with two leather straps in brown and black respectively, so it's up to you to give the Strap its final look.

Bønnelycke mdd

Unconventional architect with no whims and fancies
Based in Aarhus, Denmark

Bønnelycke Mdd was established in 1988. Driven by a nosurpressable urge and desire to work constructively and innovatively, Bønnelycke mdd started his career with the design of lamps, furniture and interior decorating. Quickly, he became known as an unconventional architect with no whims and fancies. His ability to challenge and optimize the manufacturing process itself is to be found in Henrik's original professional background as a toolmaker. "It could be fun" and "of course it can be done" – are phrases often used in his company.

From day one, the core of his work has been to create products simply because they are needed. Designs by Bønnelycke Mdd grow out of a specific need or requirement expressed by the customer – and by the general public as such. This has resulted in a comprehensive portfolio of projects and designs allowing the company to slowly but steadily expand over the years.

Bønnelycke mdd
Owner and architect

Mimi™

The slim and elegant design of the Mimi spots by Bønnelycke MDD fits perfectly in a hallway, kitchen or any other space that needs a pleasant, directional light.

The spots can be turned and tilted to light up specific areas or larger surfaces. Soft golden details add a unique touch to the classic design.

Learn more about Mimi on p101

Nono Pendant 23, White by Bønnelycke mdd

NonoTM

Danish designer Bønnelycke MDD has designed the Nono series with inspiration from modern, geometric shapes. The design language is simple and timeless, carried out in solid, high quality materials. An acrylic diffuser hides the bulb and creates a pleasant light with no glare. Perfect over a dining table where it will emit a soft and functional light.

Learn more about Nono on p100

Nono Pendant 23, Black by Bønnelycke mdd

Nobu Wall, Grey by Bønnelycke mdd

NobuTM

The Nobu table lamp by Danish designer Bønnelycke MDD is the perfect classic table or wall light carried out in a modern and minimalist design.

The lamp can easily be adjusted in both lamp head and arm for a functional work light, reading light or any other need. A gentle tap on the touch switch with light indication turns the lamp on and off.

Learn more about Nobu on p102

Nobu Clamp, Grey by Bønnelycke mdd

Nobu Table, Black by Bonnellycke mdd

Nexus 2.0 Wall, Black by Bønnelycke mdd

NexusTM 2.0

NEXUS 2.0 is an exciting series that epitomises Nordic cool. We are relaunching the series in black and white with a new silky matte surface. The details tell the story of a light with an opulent design, for example, the toggle switch in the best retro style, the elegant rotatable joint in solid brass and the pendant's invisible transition between shade and cord.

[Learn more about Nexus 2.0 on p112](#)

Nexus 2.0 Pendant 10, Black by Bonnellycke mdd

Sometimes an evergreen needs an update, and that is what we have given the Nexus series. The on/off switch is now stronger and in brushed brass to match the joint, the wall lamp has a moulded bracket and the surface of the whole series is now satin soft.

Nexus 2.0 Table, Black by Bønnelycke mdd

Nexus 2.0 Pendant 20, White by Bønnelycke mdd

Artist™

With its contemporary design and simple shape, the award-winning Artist is a beautiful candidate for a future classic. The build-in LED panel is covered with a opalized shade, which soften and defuse the light. As the name suggests, the design is inspired from the world of music – by a drum kit cymbal.

Artist 40 Pendant, Copper by Bønnelycke mdd

MIB™

The MIB series has been extended with an elegant and minimalist spot for ceiling mounting. The spot has been developed to be mounted directly over the power outlet in the ceiling. Therefore, there is no on/off on the lamp – this is controlled by your switch in the wall. The sleek and adjustable lamp head can be directed to where you need the light. The beautiful and simple design gives a minimalist expression and will fit into many styles and interior settings.

Learn more about MIB on p116

SpaceB

SpaceB realises the desire to create an extremely simple lamp in terms of expression. The simple and current design is given a particular twist of pleasant lighting through three different settings for temperature and brightness. An illuminating surprise element which sets new standards for innovative lighting and contributes great functional value. The sculptural floor lamp can be tilted to all sides, and if you place it so that it shines its light against the wall, a decoration of light appears on the wall – particularly visual if you place several lights side by side, tilt them in different directions and choose different colour temperatures.

Design. For. The People.

Design For The People (est. 2015) has always been a love child for Nordlux. Born out of passion for great Danish design, materials that are made to last and making light an extraordinary experience.

We never compromise, and every detail and action is based on a design driven devotedness to manifest the products and the brand as affordable Danish design that contributes to great value in our lives and our surroundings.

To manifest this dedication and devotedness, a redesign of the Design For The People logo has been made. We are dedicated to greatness, and this is followed through in everything we do and communicate.

The first element in the new logo is the brandmark, which is the cornerstone of the logo. This is also why you can experience the abbreviation of Design For The People in written: dftp.

The second element in the logo is the strapline, which is the supportive part of the logo that unites and emphasizes the brand name. Its rounded shape gives an organic and soft look, giving it a more contemporary expression and tying the knot to the brand's DNA. The strapline also elaborates the abbreviation in the brandmark: The full brand name; Design For The People.

DESIGN FOR THE PEOPLE

dftp

DESIGN FOR THE PEOPLE

dftp

Our passion is design and Danish design is a strong cornerstone in our DNA, and is reflected in everything we do and communicate. We never compromise, and every detail and action is based on a design driven devotedness.

DESIGN FOR THE PEOPLE

dftp

It indicates our movement, the place that our products, but also our Brand DNA and the feeling is going to and toward. We are always moving and striving to exceed ourselves.

DESIGN FOR THE PEOPLE

dftp

We are for the people, and embrace all kinship of people, where we are united by the passion and love for great Danish designs. We make products, which are to be loved and used by real people in real lifes.

BIM & projects

You can download Revit, AutoCAD & ArchiCAD files,
which are some of the most used file types

After great demand and daily requests from our customers,
we are now ready to offer you a new service.

BIM Objects is the preferred go-to database for architects,
project managers, interior designers and others around the
world when building and decorating various projects.

Now you can download 3D-files of a selection of our lamps,
enriched with product data, providing you with better
opportunities to plan and design our lamps into the
constructions. The product range will continuously
be extended.

We know that a 3D-file is not just a 3D-file. There is a wide
variety of formats and versions of BIM-files, and different
industries use different versions.

Explore all cases 

Arla Unika

In the Arla Unika stores, the Bønnelycke mdd has used the lamps Artist & MIB from the Design For The People collection. The Artist pendant are used above the counter, where it is especially important for the customers to see the product clearly and in a nice warm light.

Likewise, several low-hanging Artist pendants are mounted above the long table for sampling contribute to a good light and intimate atmosphere with the large illuminated surface.

On the shelf with delicacies, the goods are wrapped in paper and therefore, the same bright light as at the counter is not necessary. Therefore, the MIB spotlight is used to create a combination of 'hot-spots', indirect light and shadows.

The following Design For The People products are utilized in the project: Artist 25 & 40 in cobber & MIB 6 spotlight.

FSC® & responsibility

We design and manufacture lighting with great knowledge of, and consideration for, how light affects us humans and our wellbeing. It is an essential part of our product development. With manufacturing and product development also comes responsibility – a responsibility to protect the resources we have available, and the people we work with.

At the immediate level, this mainly concerns investing in continuous improvement, including our product development. By focusing on low prices, we commit ourselves to looking at new, simple solutions and processes that use less material, as well as long-life technology. Basically, this means that we take into account many more elements than just that a design should be nice to look at. We assess whether a design can be made more appropriate and less costly through small adjustments. For example, it makes sense for the installation of our lamps to be as simple as possible, ensuring that no additional resources are required for installation. That is why we have more than 60 dedicated engineers, each with more than 10 years of experience in lighting technology, in our development department, all constantly working with this focus.

We are at the forefront when it comes to the development of energy-saving LED technology. You no longer need to compromise between the desire for a warm, pleasant light, innovative design, and the desire to keep power consumption down. Development in this area moves quickly, and new solutions and processes are constantly emerging, making it possible to combine aesthetics with greener technology.

FSC

We focus on protecting our resources and the environment. This is one of the reasons why we have been FSC certified since 2016. FSC certification is about using trade forest products such as wood and paper from responsible sources, and ensuring clear traceability for the wood – all the way from forest to the finished product in the shop.

Responsible sources refers to local populations, animals and plant life being taken into consideration, that logging is done in an environmentally appropriate way and that the deforested areas are replanted.

The desire and motivation for FSC certification of the products which include wood is a natural continuation and development of our approach to environment and sustainability – and we will continue to demand FSC certified wood for those of our design products that include wood.

We see sustainability as a task involving everyone associated with Nordlux – from the owners, board and management to employees and suppliers.

***FSC® stands for Forest Stewardship Council® and is a recognised international non-profit labelling scheme for wood and paper.**

FSC certification ensures responsible forest management and improved living conditions for the local population in forests worldwide.

FSC-C124559

IP code

Safety and water
protection classification.

Nordlux uses the IP code system to explain how well suited products are for humid environments, such as bathroom and outdoors.

The IP code is an international standard, that classifies and rates the degree of protection against intrusion, dust, accidental contact and water.

IP consists of two digits. First digit explains effectiveness against intrusion of objects. It is important to protect electronics against contact with hands and fingers and Nordlux's products adhere to all the legal standards for this, typically level 2. We even offer products that are completely protected against dust – that would be level 6. Second digit explains the degree of water protection. 0 being no protection and 5 meaning protected against water jet from all directions.

	Intrusion protection	Water protection
Degree and protection	0 Not protected	0 Not protected
Protected against	1 Solid objects larger than 50 mm	1 Vertically dripping water
Protected against	2 Solid objects larger than 12 mm	2 Vertically dripping water at an inclination of 15° degrees
Protected against	3 Solid objects larger than 2,5 mm	3 Splashes of water at an angle of up to 60° degrees
Protected against	4 Solid objects larger than 1,0 mm	4 Sprinkling of water
	5 Dust protected	5 Protected against water jets
	6 Dust-proof	6 Protected against strong waves
		7 Protected against the effects of temporary immersion in water

Light source info

Kelvin

(K) is the colour temperature of the light source- the higher number the colder light.

3000 K = warm white

4000 K = neutral white

GB - The LED technology is constantly undergoing major development which contributes to continuous arrival of new and better LED bulbs on the market. Nordlux always strives to deliver the latest LED technology to our customers, which is why when purchasing lighting or bulbs, the new bulbs can seem different, with improved colour/ light output/design.

*For additional bulb info please go to www.nordlux.com.

DK - LED er til stadighed under en betydelig udviklingsproces, som bevirker, at der med stor hyppighed kommer nye og bedre LED pærer på markedet. Nordlux bestræber sig på altid at levere den nyeste LED teknik til vores kunder, hvorfor man ved genkøb af lamper og ved tilkøb af pærer kan opleve, at de nye pærer har anderledes og forbedret farve/lysudbytte/udformning.

*For supplerende pæreoplysninger gå venligst til www.nordlux.com

Lumen

(lm) is the measurement unit for luminous flux. Luminous flux is the total amount of light that the light source submits.

SE - LED är fortfarande under en betydande utvecklingsprocess, som bidrar till att det i snabb takt kommer nya och bättre LED lampor på marknaden. Nordlux strävar efter att leverera den senaste LED-tekniken till sina kunder, därför kan man vid återköp eller vid köp av nya lampor uppleva att de nya lamporna har en annorlunda och förbättrad färg/ljusflöde/utformning.

*För ytterligare information angående ljuskälla vänligen gå till www.nordlux.com

FR - LED est constamment en développement important, ce qui a pour effet d'amener très fréquemment de nouvelles ampoules LED améliorées sur le marché. Nordlux s'efforce de toujours fournir la dernière technologie LED à nos clients ; c'est pourquoi, lorsque vous rachetez des lampes et acquérez des ampoules, vous pouvez trouver que les nouvelles ampoules ont une couleur/une sortie de lumière/un design différents et améliorés.

*Pour plus d'informations concernant l'ampoule merci de visiter www.nordlux.com.

RA

is the colour rendering that the light source provides.

DE - LED unterliegt ständig einem bedeutenden Entwicklungsprozess, durch den mit großer Geschwindigkeit neue und bessere LED-Lampen auf den Markt kommen. Nordlux ist bestrebt, Ihren Kunden immer die neueste LED-Technik anzubieten, wodurch man beim Neukauf von Leuchten und Nachkauf von Leuchtmitteln erleben kann, dass die neuen Leuchtmittel eine andere und verbesserte Farbe, Lichtausbeute und Form haben.

*Für weitere Informationen gehen Sie bitte zu Leuchtmittel www.nordlux.com.

BV - De Led technologie ondergaat een continue verbetering die bijdraagt tot nieuwe generaties LED lampen. Nordlux streeft ernaar die nieuwste technologie aan te bieden aan zijn klanten. De verbeterde technologie zorgt voor kleine veranderingen in de verlichtingsarmaturen en lampen ten voordele van een verbeterde lichtopbrengst, verbeterde kleur-echtheid en design.

*For additional bulb info please go to www.nordlux.com.
